

LEDBox 24V

POWER SUPPLY AND CONTROLS LED 24Vdc

Control unit with integrated power supply for the control of 24V LEDs in constant voltage. With a simple programming it is possible to set the desired operating mode: Dimmer for white / single color LEDs, CCT, RGB and RGBW for the management of the temperature and color of the light. Integrated radio receiver and WiFi module for a wireless control via radio remote controls and remotely with smartphone.

LedBox Available versions

LB-50/One

Control unit for 24Vdc LEDs, 4 outputs with settable mode for white or single-color LEDs, CCT, RGB and RGBW. 433.92MHz radio receiver. 1 wired input settable as button or switch. Integrated WiFi module for remote control via OneSmart App and voice control. Integrated power supply, max 50W.

LB-100/One

Control unit for 24Vdc LEDs, 4 outputs with settable mode for white or single-color LEDs, CCT, RGB and RGBW. 433.92MHz radio receiver. 1 wired input settable as button or switch. Integrated WiFi module for remote control via OneSmart App and voice control. Integrated power supply, max 100W.

LB-150/One

Control unit for 24Vdc LEDs, 4 outputs with settable mode for white or single-color LEDs, CCT, RGB and RGBW. 433.92MHz radio receiver. 1 wired input settable as button or switch. Integrated WiFi module for remote control via OneSmart App and voice control. Integrated power supply, max 150W.
